

The RoJaus decanter presents an elegant serving piece to complement all enthusiasts' wine collections. From its graceful styling to its built-in ease of presenting fine wine, the RoJaus decanter was created to entertain as well as enhance the wine's bouquet.

As wine is poured into the decanter, it wraps around the "wine bubble" exposing it to the air. The bouquet is released and the wine is allowed to breathe. Once decanted, the unique RoJaus nozzle easily dispenses wine into a wine glass.

The RoJaus wine decanter features stainless steel construction, custom blown glass and a unique dispenser which individuals use to serve themselves. The decanters are very versatile. They can be used as centerpieces for dinner affairs as well as focal points at wine events.

The RoJaus Decanter line offers several different looks to satisfy your individual taste. From a contemporary look to more classical displays, three unique decanters have been carefully crafted to suit your personal style,
